

Claims

What is claimed is:

1. A heat sink assembly for facilitating air flow, comprising:

a base portion having a heat dissipation part, wherein a platform is disposed in one side of said base portion and an inclined plane is respectively disposed in two sides of said platform; and

a plurality of heat sinks disposed on said base portion, wherein said heat sinks are disposed in the direction extending upward from said platform and said inclined plane in said two sides, said heat sinks are lined up with equally spaced distance;

whereby said heat sink assembly guides and facilitates air flow so as to dissipate heat.

2. The heat sink assembly of claim 1, wherein a frame is disposed out from said heat sinks of said heat sink assembly.

3. The heat sink assembly of claim 2, wherein a fan is disposed on said frame.

4. The heat sink assembly of claim 1, wherein said heat dissipation part extends from one end of said base portion to another end.

5. The heat sink assembly of claim 1, wherein said base portion is disposed in the central portion of said heat sinks.
